We are always looking at ways in which we can improve the information we provide our members. Our online [Member Voice Panel](#) allows you to be part of a community and express your views and opinions of USS. Your feedback will influence the way we do things and impact future decision making.

Investments with you in mind

We make investments with long-term investment goals in mind. [Find out more about where we invest.](#)

The investment managers

USS Investment Management Limited (USSIM) oversees your money. Some of our investments are directly managed by a team of in-house investment professionals but we also select and monitor a range of external investment managers. Our investment managers can adapt to the ever-changing markets – and help towards building a more secure financial future for you.

Your investment choices

When we make investments, we think about the impact of financially material environmental, social and governance (ESG) issues. In addition, all our members with Defined Contributions (DC) savings in the Investment Builder have the choice to invest in our ethical investment options:

Do It For Me option

You can let our team manage your investments with the Do It For Me option. Here, you also get to choose between the USS Default Lifestyle Option or the USS Ethical Lifestyle Option.

Let Me Do It Option

You can make your own investment choices with the Let Me Do It Option. Here, you get to choose to invest in one or more of the 10 funds available, which include ethical options.

To find out more about where your Investment Builder savings are invested and your options, visit [Choosing your investments page](#).

Our investment glossary is designed to help you better understand the world of investing. Find out what different terms used throughout this report mean:

Investment commentary January 2026 - March 2026

Global markets fell over the 3 months to 31 March 2026, pressured by escalating conflict in the Middle East, which led to higher energy prices and renewed recession concerns. US technology stocks experienced falls, driven in part by the software sector. Non-US equities including emerging markets also struggled as weaker global growth forecasts and elevated inflation risks weighed on sentiment. However, historic long-term equity returns remain positive.

Your Investment builder pot is invested to grow over time and can go up or down with markets. We take a long-term approach to investing, so short-term ups and downs are a normal part of how your pension grows over time.

A challenging start to the year, with heightened volatility

- Global equities posted losses in the first quarter, as weakness in some US technology stocks and the escalation of conflict in the Middle East weighed on investor sentiment. Emerging markets outperformed developed markets, while Japan was a notable exception with positive performance in developed markets. Higher oil prices supported energy and basic materials companies, however, heightened geopolitical uncertainty and renewed inflation concerns weakened risk appetite and left most regions lower by the end of March.
- Global bond markets came under pressure in March as higher energy prices fuelled inflation concerns and prompted selling across most major government bond markets. US government bonds proved relatively resilient, while UK government bonds saw sharper yield increases (which means falls in prices) as investors reconsidered interest rate cuts. In credit markets, US corporate bonds outperformed their European counterparts.
- The performance of the scheme's private market investments was positive over the quarter. Private Credit and Infrastructure investments in particular contributed positively to performance. Over the longer term, the trustee believes that private markets provide investment opportunities and structures not available in public markets, which may provide opportunities for additional returns, diversification, protections, or other desired characteristics relative to public market assets.
- The Ethical Lifestyle option underperformed the Default Lifestyle option, largely due to relatively higher equity weighting and the market rotation away from value and tech (which ethically screened equity investments have more exposure to) and towards energy and defence stocks (many of which are excluded in the Ethical Lifestyle option).
- In the Let Me Do It investment options, performance was mixed. Passively managed funds performed broadly in line with their benchmarks. Active funds delivered mixed relative performance over the quarter: the Emerging Markets Equity Fund was the strongest performer in absolute terms and outperformed its benchmark, while the Bond Fund slightly underperformed; the UK Equity Fund generated positive returns.

Lifestyling explained: Do It For Me Option

If you select the Do It For Me Option, we gradually move your investments over time through different blends of Growth, Moderate Growth, Cautious Growth and Liquidity, which are gradually less susceptible to market volatility but still do carry risks. This is called lifestyling and it begins 10 years from your Target Retirement Age (TRA).

Here's how lifestyling works:

*At present you can keep your money in the Investment Builder after you retire. USS rules allow up to four withdrawals per year, (current legislation permits withdrawals) but there won't be any further automatic moving in the investments after you've reached your TRA.

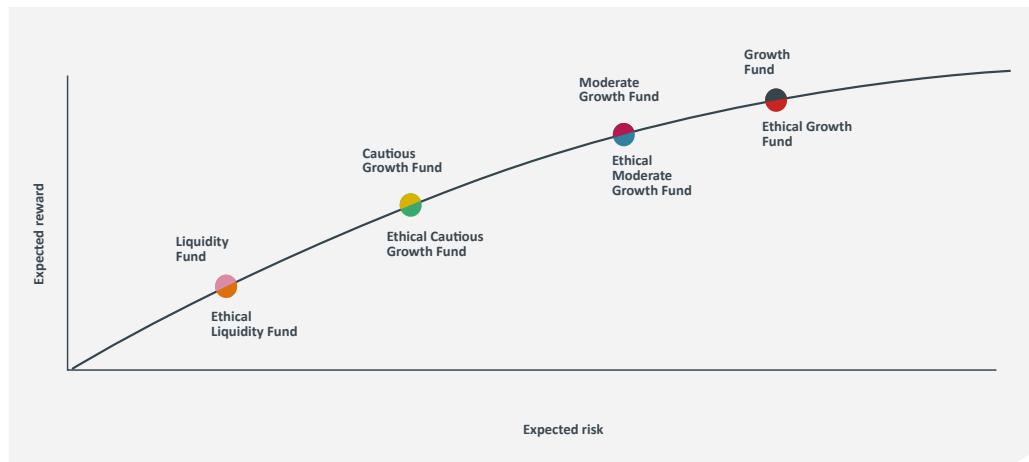

The breakdown of the funds within the lifestyle options shown and how they move over time may be subject to change from time to time, so it is important for you to refer to the latest version of this guide for the most up to date information.

Performance and risk metrics: Do It For Me funds

Comparative risk

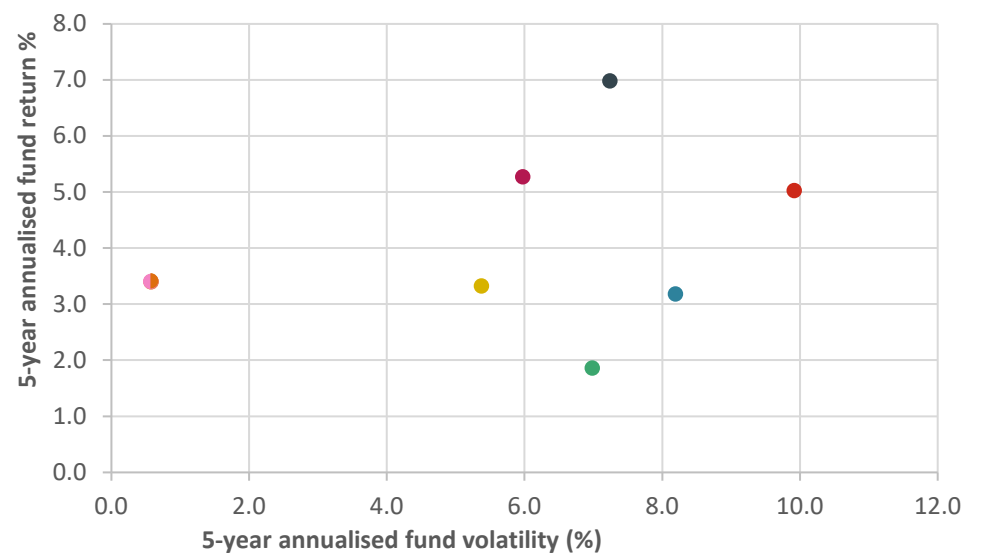

Risk factor

This illustrative chart shows how we expect the risk of the Do It For Me funds to compare over the long term. The risk factors range from Low to High and are shown on a relative basis.

Realised risk and return

This chart shows a comparison of the realised risk and return of the Do It For Me funds (after subsidy) over a 5 year period.

Performance and risk metrics: Do It For Me funds

Cumulative performance

This chart shows the cumulative performance of USS funds against the Consumer Price Index (CPI) over a 5 year period. CPI is a good indicator of inflation as it measures the change in price of consumer goods and services. 5-year cumulative performance is the increase or decrease of returns as a percentage over the whole period. So, if a fund is performing above the CPI, it means that money saved in it is growing faster than the rise in the cost of living.

USS Growth Fund

Aim of fund: To produce a CPI+ 3.0% per year return over the long term by primarily investing in a mix of equities, bonds and private markets. The Fund is more likely to move up and down in the short term than the USS Moderate Growth Fund, but aims to produce a higher long term return. The Fund uses a mix of active and passive management. The Fund is predominantly exposed to a diversified range of currencies designed to balance the risks of the Fund, with some Sterling exposure.

Fund performance

Performance summary

- The Fund delivered negative returns over the three months to 31 March 2026, driven mostly by its allocation to global developed markets equities, which generated poor returns during the period.
- The Fund remains ahead of its Long-Term Return Target over one and three year periods, with the underperformance over the last five years driven by a period of elevated inflation.

Risk Measures:

Five-year annualised fund volatility: **7.2%**

Asset allocation (%)

Fund Facts

Long Term Return Target **CPI+ 3.0% p.a.***

Launch date **3 October 2016**

Fees (before subsidy) **0.30%**

Fees (after subsidy) **0.00%**

Fund Size **£2,406.5m**

Management style **Mix**

*The USS Growth funds, which make up part of the Default Lifestyle Option, the Do It For Me Option, and which members can choose in the Let Me Do It Option, have a long-term return target above the Consumer Price Index (CPI) measure of inflation, instead of an objective and benchmark based on a market comparator. [Find out more on the How we invest page.](#)

USS Moderate Growth Fund

Aim of fund: To produce a CPI+ 2.0% per year return over the long term by primarily investing in a mix of equities, bonds and private markets. The Fund is more likely to move up and down in the short term than the USS Cautious Growth Fund, but aims to produce a higher long term return. The Fund uses a mix of passive and active management. The Fund is exposed to a diversified range of currencies, including Sterling, designed to balance the risks of the Fund.

Fund performance

Performance summary

- The Fund delivered negative returns over the three months to 31 March 2026, driven mostly by its allocation to global developed markets equities, which generated poor returns during the period.
- The Fund is ahead of its Long-Term Return Target over one and three year periods, with the underperformance over the last five years driven by a period of elevated inflation.

Risk Measures:

*The USS Growth funds, which make up part of the Default Lifestyle Option, the Do It For Me Option, and which members can choose in the Let Me Do It Option, have a long-term return target above the Consumer Price Index (CPI) measure of inflation, instead of an objective and benchmark based on a market comparator. [Find out more on our How we invest page.](#)

USS Cautious Growth Fund

Aim of fund: To produce a CPI+ 1.5% per year return over the long term by primarily investing in a mix of equities, bonds and private markets. The Fund aims to move up and down in the short term less than the USS Moderate Growth Fund, but also aims to produce a lower long term return. The Fund uses a mix of passive and active management. The Fund is predominantly exposed to Sterling, with some currency diversification designed to support the balance of risks of the Fund.

Fund performance

Performance summary

- The Fund delivered negative returns over the three months to 31 March 2026, driven mostly by its allocation to global developed markets equities, which generated poor returns during the period. This was partially offset by defensive allocations to bonds and other types of credit.
- The Fund is ahead of its Long-Term Return Target over one and three year periods, with the underperformance over the last five years driven by a period of elevated inflation.

Risk Measures:

Five-year annualised fund volatility: **5.4%**

*The USS Growth funds, which make up part of the Default Lifestyle Option, the Do It For Me Option, and which members can choose in the Let Me Do It Option, have a long-term return target above the Consumer Price Index (CPI) measure of inflation, instead of an objective and benchmark based on a market comparator. [Find out more on our How we invest page.](#)

USS Liquidity Fund

Aim of fund: To produce a return in line with the benchmark, which represents short-term Sterling interest rates. The Fund will mainly invest in short-term Sterling money market instruments including deposits, commercial paper and short-term bonds. The money market securities are issued by a number of different entities including governments, banks and companies.

Fund performance

Performance summary

- The Fund produced a return in line with short term interest rates, as expected. Short term interest rates, which are set by Bank of England's Monetary Policy Committee, were held at 3.75% in March 2026.

Risk Measures:

Five-year annualised fund volatility: **0.6%**

Since 1 October 2021: Bank of England's SONIA (Sterling Overnight Index Average) interest rate.

Up to 30 September 2021: 7-day GBP London Interbank Bid Rate.

USS Ethical Growth Fund

Aim of fund: To produce a CPI+ 3.0% per year return over the long term by primarily investing in a mix of equities and bonds with some private market investments. The Fund is more likely to move up and down in the short-term than the USS Ethical Moderate Growth Fund but aims to produce a higher long term return. It also aims, so far as is practicable, to invest in investments that meet the [USS Ethical Guidelines](#). The Fund uses a mix of passive and active management. The Fund is predominantly exposed to a diversified range of currencies designed to balance the risks of the Fund, with some Sterling exposure.

Fund performance

Performance summary

- The Fund delivered negative absolute returns over the three months to 31 March 2026, driven mostly by its allocation to global developed markets equity.
- The Fund is ahead of its Long-Term Return Target over one and three year periods, with the underperformance over the last five years driven by a period of elevated inflation.

Risk factor

This chart shows how we expect the risk of the Let Me Do It funds to compare over the long term. The risk factors range from Low to High and are shown on a relative basis.

Realised risk and return

This chart shows a comparison of the realised risk and return of the Let Me Do It funds (after subsidy) over a 5 year period.

Performance and risk metrics: Let Me Do It funds

Cumulative performance

This chart shows the cumulative performance of USS funds against the Consumer Price Index (CPI) over a 5 year period. CPI is a good indicator of inflation as it measures the change in price of consumer goods and services. 5-year cumulative performance is the increase or decrease of returns as a percentage over the whole period. So, if a fund is performing above the CPI, it means that money saved in it is growing faster than the rise in the cost of living.

USS UK Equity Fund

Aim of fund: To rise or fall in line with the benchmark, which represents equities in UK companies. The Fund will mainly invest in equities in UK companies. The Fund is passively managed.

Fund performance

Performance summary

- The Fund delivered positive absolute returns over the three months to 31 March 2026.
- UK equities were positive over the quarter, helped by their significant exposure to energy stocks and by a weaker sterling, which supported internationally focused companies.

Risk Measures:

Five-year annualised fund volatility: **10.2%**

Q1 2026

Management style	Passive	

USS Global Equity Fund

Aim of fund: To rise or fall in line with the benchmark, which represents equities in companies across the world. The Fund will mainly invest in shares in companies across the world, including emerging markets. The returns generated by overseas equities are not currency hedged, so may be impacted by currency movements. The Fund is passively managed.

Fund performance

Performance summary

- The Fund delivered negative absolute returns over the three months to 31 March 2026, and it was slightly ahead of its benchmark. The absolute performance over the longer term remains strong.
- Global equity markets came under pressure over the period, with escalating conflict in the Middle East contributing to a weaker risk sentiment.

Risk Measures:

Five-year annualised fund volatility: **10.8%**

Q1 2026

Benchmark	Composite*
Launch date	3 October 2016
Fees (before subsidy)	0.10%
Fees (after subsidy)	0.00%
Fund Size	£219.8m
Management style	Passive

*Composite Benchmark Since 11 November 2024: Solactive USS Developed Markets Climate Tilted Index (90.0%), MSCI Emerging Markets Index (10.0%).

From 1 April 2022 to 11 November 2024: Solactive USS Developed Markets Climate Transition Benchmark (92.00%), MSCI Emerging Markets Index (8.00%)

Up to 31 March 2022: MSCI World Index (92.0%), MSCI Emerging Markets Index (8.0%).

USS Emerging Markets Equity Fund

Aim of fund: To produce a return better than the benchmark, which represents equities in companies in emerging markets. The Fund will mainly invest in equities in companies in emerging markets, or that have exposure to emerging markets as a result of generating some of their revenue there. The returns generated by overseas equities are not currency hedged, so may be impacted by currency movements. The Fund uses a mix of passive and active management.

Fund performance

Performance summary

- The Fund delivered positive absolute returns over the three months to 31 March 2026 and was ahead of its benchmark.
- Emerging markets outperformed developed markets, initially supported in January and February by AI-linked strength in markets such as South Korea and Taiwan, and later by more commodity and value-oriented markets, including parts of Latin America, during the March volatility.

Risk Measures:

Five-year annualised fund volatility: **14.6%**

USS Ethical Equity Fund

Aim of fund: To produce a better return than the benchmark over the long term, which represents equities in companies across the world. The Fund will aim, so far as is practicable, to invest in shares in companies that meet the [USS Ethical Guidelines](#), which may result in return deviations when compared to the Fund's broad market benchmark. The returns generated by overseas equities are not currency hedged, so may be impacted by currency movements. The Fund uses a mix of passive and active management.

Fund performance

Performance summary

- The Fund delivered negative absolute returns and slightly lagged behind its broad equity market benchmark due to ethical screening. This is largely due to the market rotation away from value and tech (which ethically screened equity investments have more exposure to) and towards energy and defence stocks (many of which are excluded in ethically screened funds).
- The active manager, Impax, was removed during the quarter and the search for a suitable replacement is underway.
- The Fund invests in accordance with the USS Ethical Guidelines.

Risk Measures:

Five-year annualised fund volatility: **12.3%**

Asset allocation (%)

● Global Developed Markets Equity

Fees (after subsidy)	0.00%
Fund Size	£101.8m
Management style	Mix

USS Sharia Fund

Aim of fund: To rise or fall in line with the benchmark, which represents shares which meet Islamic investment principles. The Fund will invest in equities which meet Islamic investment principles. The returns generated by overseas equities are not currency hedged, so may be impacted by currency movements. The Fund is passively managed.

Fund performance

Performance summary

- The Fund delivered negative returns over the quarter, primarily driven by its exposure to US technology stocks.
- The Fund is a global passive index fund investing in equities compliant with Islamic investment principles, so it will tend to hold fewer shares in financial companies (like banks) and more in other sectors, such as technology, when compared to the global equity market. Technology stocks were the primary driver of poor performance over the quarter.

Risk Measures:

Five-year annualised fund volatility: **14.2%**

Important information

Performance shown is after any subsidy, within the relevant USS Fund.

Past performance is not a guide to future performance and so should not be relied upon by members when making investment decisions. The value of investments may go down as well as up and the return of your investments is not guaranteed.

Each Universities Superannuation Scheme ('USS') Fund objective and benchmark has been determined by Universities Superannuation Scheme Limited (the 'Trustee'), who is responsible for selecting funds in the USS range, which may be added to, removed or replaced from time to time. The Trustee may also change the objective and/or benchmark(s) for any of the USS Funds from time to time. Member selections are to the relevant USS Fund(s) and are not to or made in respect of any underlying fund manager. The underlying fund manager(s) can be changed at any time. In certain circumstances your investments could be diverted to another fund(s).

The information and data contained in this report have been obtained from Northern Trust and the underlying fund managers and is not verified by the Trustee. The Trustee does not represent that such information is accurate or complete and it should not be relied on as such. Neither the Trustee nor the third-party sources accept responsibility for any loss caused to any recipient of this document as a result of any error, inaccuracy or incompleteness of this information or as a result of any third-party error. Any opinions expressed in this report are the Trustee's own views and may change.

This quarterly report has been produced by the Trustee and should be read in conjunction with the USS Member Guide and the USS Investment Guide, available on our website. This report and the data contained therein is for information purposes only as at the date of publication. It does not consider your personal circumstances and does not constitute financial advice or a recommendation to make (or refrain from making) any kind of investment decision. If you are not sure what's best for you, or do not understand the terminology used herein, we recommend you speak to an independent financial adviser before making any decisions in relation to your investments or any changes to them. You can find an independent financial adviser at www.unbiased.co.uk. You may be charged a fee for any advice you receive.

Fees may be changed at any time by the Trustee and members should check the latest version of this report and the USS website for the current fees and any proposed changes to them. Information about the Investment Builder default investment strategy and the costs and transaction charges for the Investment Builder funds can also be found in the 'Chair's defined contribution statement' in the Governance section of the USS Report and Accounts, available on our website. Part or all of the charges are currently covered by a subsidy paid by employers. This subsidy is expected to remain in place for a number of years. Members who transfer other pension savings in to USS do not benefit from the employer subsidy on that portion of their pension savings.

Our investment glossary is designed to help you better understand the world of investing. Find out what different terms used throughout this report mean: uss.co.uk/how-we-invest/investment-glossary
