Heathrow case study

In 2013-14, we acquired 10% of FGP Topco Limited, the holding company which owns Heathrow Airport Holdings Limited, from Ferrovial and other shareholders.

Heathrow is one of Europe's hub airports and the busiest airport in Europe by passenger numbers. Heathrow is the only hub airport in the UK and the primary airport in London, which is the world's largest aviation market. Heathrow serves 75 direct destinations that are not served by any other UK airport and handles more than 80% of all long haul passengers flying to or from the UK.
